

CONTENTS

<i>To the 80 anniversary V. G. Kvasha</i>	3
<i>Blikharskyy Z., Khmil R., Dudycz S. Strengthening of reinforced concrete structures using prestressed elements</i>	5
<i>Braychenko S., Marhal I. Disperse sulfur concrete reinforced with fiberglass and their endurance</i>	13
<i>Bula S. Deflection of joints in steel-to-timber connections</i>	18
<i>Voznyak O., Sukholova I., Myroniuk Kh. Modeling indoor air flow in the unsteady mode</i>	25
<i>Havrylko O., Bilinsky B. Influence of water type water torques on fire fight protection</i>	33
<i>Hladyshch D., Hladyshch H., Butrynskyi I. Instrumental survey data processing and actual state estimation of concrete taking into account the time factor</i>	38
<i>Hnativ R., Bosak M., Hnativ I. Research unsteady a pressure head pipe flow based on mathematical models</i>	48
<i>Hnidets B. Precast carcassing rise buildings with irregular grids and variable height of floors</i>	53
<i>Hnidets B., Zapotochnyi R. Precast-monolithic concrete double-beams with a continuous span bridge for structure into complex construction conditions and their calculation</i>	59
<i>Horbachevska A., Kvasha V. Operational state, reconstruction and test results of reconstructed highway overpass</i>	66
<i>Gorbachevskyy R., Rubakha M., Kvasha V. The results of full-scale tests of the skew in the plan reinforced concrete beam span structures of the highway bridge</i>	78
<i>Hunyak O. Pozzolanic additives for portland cement for transportation construction</i>	88
<i>Iliv V., Iliv Y. Features use silicon substances as materials for receiving of vertical walls</i>	94
<i>Karkhut I.I. Influence of laser radiation on concrete</i>	100
<i>Kovalchuk B., Rymar Ya., Blikharskyy Z., Kholod P. Strength of the reinforced concrete beams, strengthened by the prestressed reinforcing bars</i>	109
<i>Kramarchuk A., Ilnytskyy B., Bobalo T. Seismic action for the construction of coverage precast concrete of factory building in Uzhhorod city</i>	115
<i>Kropyvnytska T., Ivashchysyn H., Kotiv M., Chekaylo M. Efficiency of use the low-energy cements for building mortars</i>	121
<i>Kushchenko V., Halushchak Y. New constructive form of rigid connection of sitecast reinforced concrete ceiling to concrete filled tube column</i>	126
<i>Luchko J., Kovalchuk V., Kovalchuk Yu. Calculation of the corrugated metal structures deflected mode under interaction with soil backfill</i>	131
<i>Marushchak U., Sanynsky M., Korolko S. Nanomodified rapid hardening fiber-reinforced concretes</i>	137
<i>Melnyk I., Sorokhtey V., Prystavskyy T., Grushka R. Monolithic flat reinforced concrete slabs with effective inserts</i>	144
<i>Orel V., Potsiurko N. Research of wind while watering lawns</i>	151
<i>Pozniak O., Melnyk V., Zavadskyy I., Melnyk A. Production, properties and using non-autoclaved aerated concrete</i>	160
<i>Rachkevych V., Semaniv L., Kvasha V., Saliychyk L. The results of experimental researches of the reinforced concrete beam span structure of the bridge by reconstruction stages</i>	166
<i>Salo V., Salo O. Experimental researches deformations and durability prestressed reinforced multi-span beam of the bridge elements length 12 m</i>	179
<i>Semaniv R. Research of physical and technical properties of ceramic bricks and its hydrophobic protection</i>	186
<i>Sobko Yu., Panchenko O., Sinyakin A., Tarnopolskij D., Vitruk V., Kot O. Vojcehivskyy O., Bajda D. SIKA technologies for bridges reconstruction</i>	191
<i>Solodky S., Topylko N., Turba Yu., Hrymak O., Novytskyy Y. Optimization of the cement compounds with the aim of increase of its physical-mechanical indicators</i>	199

<i>Tytarenko R., Khmil R.</i> The basic stochastic parameters in assessing of the reliability of reinforced concrete beams strengthened by additional reinforcement bars	206
<i>Turchyn B., Blikharskyy Z., Vegera P., Shnal T.</i> Research methodology of reinforced concrete beams with damage obtained under loading	212
<i>Cherniuk V., Ivaniv V.</i> Influence of value of input jets inflow angles on non-uniformity of water inflow into pressure pipeline-collectors along path	218
<i>Shydlovskiy Y.</i> Results of experimental study of wooden arches on punched metal plate fasteners.....	225
<i>Shynder V., Lobzin M.</i> Analysis by mathematical modeling of carrying capacity of existing residual structural elements during reinforcement	231
<i>Bašková R., Ňarjaš A.</i> Software for 4D modelling of construction projects	235
<i>Gasii G.</i> The methodology and results of experimental investigations of steel and concrete composite cable space frame on effect short-term loading	241
<i>Kapalo P.</i> Analysis of the ventilation air flow rate for renewal of windows	247
<i>Kozlejova V., Kvocak V., Dubecky D.</i> Deformation in composite structures under load-term loads.....	251
<i>Mesároš P., Talian J., Smetanková J.</i> Theoretical analysis of building information modeling libraries (BIML)	256
<i>Nagy R.</i> Ventilation in flat.....	261
<i>Plewako Z.</i> Strengthening of the reinforced concrete tank after failure.....	266
<i>Polanský T., Tomko M., Kmet' S.</i> Numerical analysis of steel frame subjected to air blast.....	273
<i>Singovszka E., Balintova M.</i> Comparison of sediment quality in river basins in Eastern Slovakia.....	279
<i>Vranay F., Stone C.</i> Innovative technology, operation and energy management of building: Science & Technology Park, TUKE.....	284
